

MPRP Action Plan

ON POLITICS... GOOD GOVERNANCE AND OPEN SOCIETY

Good governance on all levels.

An open and transparent government.

Involvement of the population in the political process.

An equal opportunity/or members of any gender, age and background.

The most important thing for the well functioning of the country and its government is not only democratic structure, but also an environment where the population is actively involved in the political decisions. The government led by our party has launched a program of "Open Government" that promotes and enables such an environment. Also with many visits to the different parts of the country by major politicians the MPRP tries to bring the politicians closer to the people (and vice versa) and have them actively involved in discussions on the local effects of national policies.

ON SOCIAL ISSUES... HUMAN DEVELOPMENT AND SUSTAINABLE LIVELIHOOD

Create a sound environment for human development.

Improve the living standard of citizens.

Assure equal access to social services.

Reduce unemployment and poverty rates.

The MPRP pays great attention to the fair distribution of social wealth and income. Current educational system of Mongolia allows equal accessibility for the entire population, in which, in compliance with interests and needs of individuals and the society as well as the market demand, it gains basic education and professional knowledge according to enriched curriculum. A mechanism, in which the state covers tuition and dormitory fees and provides scholarships for students from poor families and state employees was effectively established. In health care, the maintenance of the international standards in the quality of health care services and preventive treatments were set to target the improvement of the population's general health and increase its average life expectancy. Intensive development of Mongolia's national art and culture, in accordance with the world's cultural achievements, values and a unique spirit of the Oriental culture, was considered as the primary goal for Mongolia's cultural life.

ON ECONOMY... HEALTHY GROWTH FOR A HEALTHY SOCIETY

Ensure macro-economic stabilization.

Promote structural changes towards a more export-oriented private sector.

Maintain a high and sustainable economic growth.

Since the economy is in many ways the motor of a society, it is vital to every society to have a smooth running economic system. Our Government advocates an open stable economy and has

implemented several programs that ensured considerable production growth in the national industry, stabilized inflation and currency rates, set up effective market structure, considerably reduced state budget and foreign trade deficits, created free trade zones, brought tourism development on new level, reformed banking sector close to international standards.

ON RURAL DEVELOPMENT... EQUAL DEVELOPMENT OF ALL REGIONS

Create favorable living conditions for the rural areas.

Improve the economic infrastructure fit to rural circumstances.

In order to create a policy suitable for Mongolia's small population density and a vast area of land, MPRP proposed and implements a program on "The Concept of Regional Development". In this framework regional centers are created, "Millennium Road" that connects east and west of the country is constructed, "Wholesale Network" structure is implemented, stable pasture management system is created, and all regions are connected to centralized power sources and telecommunication system.

ON FOREIGN POLICY... PARTNERS FOR A BETTER WORLD

Maintain and improve the current international network.

Find and strengthen ties with bilateral partners.

Increase worldwide attention and knowledge about Mongolia.

During the last decade Mongolia and the MPRP have increased their international relations significantly and become part of a large and diverse global network that enables it efficiently cooperate with partners and contribute in global issues. The foreign policy of the MPRP is aimed at maintaining and further improving this network, by establishing bilateral relationships as well as cooperating within the international political institutions such as the Socialist International and Asian Political Parties Conference.

ON SECURITY... COOPERATING FOR INCREASED GLOBAL SECURITY

Improve defense and police workforce structures.

Increase professional level of army and police personnel.

The MPRP tries to look at the security as a global issue, but on the other hand it is essentially a personal feeling. On one hand Mongolia assisted the allied forces in the war in Iraq; on the other hand we put efforts in increasing the feeling of security of the man in the street for example by improving our police force.

ON THE ENVIRONMENT... PRESERVING NATURAL SPACES AND RATIONAL UTILIZATION OF RESOURCES

Ensure rational utilization of the natural wealth of the country.

Cooperate with an ecologically friendly economic development.

Maintain and improve the mechanism of locally-protected nature and environment.

Rational utilization of the natural wealth with due consideration of its capacity, maintaining rehabilitation based ecologically friendly economic development, ensuring due utilization and protection of the natural wealth are issues under MPRP's high consideration. The current government has made great efforts in improving the protection of the natural environment and a large area of the current land surface has been assigned the status of protected area.
